**EXPERTS IN
GAS DETECTION**

SINCE 1984

OUR MAJOR MILESTONES

ABOUT OUR COMPANY

Comercial de Aplicaciones Electrónicas, S.L. (C.A.E., S.L.) was registered in February 1990 with the new Companies Act, continuing its design, manufacture, marketing and repair of safety systems for gas installations that were already being developed by Julio Bouzas under the FIDEGAS® trademark since 1984.

FIDEGAS® is a trustworthy private brand that is recognised both nationally and abroad, thanks to the certified quality and safety of its products, with a broad range of references that cover a significant part of the market needs.

INNOVATION PROJECTS

H₂BIDEA

Development of technological solutions to operate with 100% hydrogen distribution networks on the road to decarbonisation.

1. ALARM CONTROL UNITS

CA Control Unit

Alarm control units for 2, 4 and 8 certified gas detection transmitters in accordance with Standard EN 60079-29- 1, therefore meeting the requirements of European Directives 2014/34/EU ATEX (explosive atmospheres) and 2014/30/ EU (Electromagnetic compatibility).

Its use with compatible FIDEGAS® S/3 and S/2 gas detection transmitters ensures a high degree of linearity and precision in terms of required detecting levels, while its 4-20 mA current loop output makes the system easy to install.

CERTIFIED PRODUCT

1. ALARM CONTROL UNITS

SCAEDA Control Unit

Central alarm with touch screen for configuration and monitoring through a synoptic, based on industrial communication and allowing the connection of up to 14 remote Sensors with serial communication per line, up to a maximum of 3 lines (42 Sensors). The connection to the Sensors via RS485 is “plug-and-play”, which means that these are automatically detected by the control panel and do not need to be configured.

Each connected Sensor has 2 configurable alarm levels in both value and operating mode. In addition, through the control panel, it is possible to communicate individually with each Sensor for diagnosis, configuration and calibration. Each line has 4 potential-free inputs that can be addressed to any of the line outputs and can be configured in operating mode, normally open, normally closed, with or without interlocking.

TECHNICAL SPECIFICATIONS

| | | |
|----------------|-------------------------------|---|
| Scope | Commercial and industrial | The standard configuration consists of one line. Additional lines up to a maximum of 3 |
| Supply | 110-230 Vac - 50/60 Hz | Alarm levels |
| Inputs | 4 LP (per line) | 1 of alarm silence (per linea) 2 levels per Sensor |
| Outputs | 5 of alarm / fault (per line) | Indications |

1. ALARM CONTROL UNITS

CS4 Control Unit

Alarm control unit suitable for installation on a DIN rail. Allows for the connection of up to 4 gas detection transmitters simultaneously through its 4 analogue (4-20 mA) or digital (0-10/15 V) inputs. Has two LP switched outputs, which the gas detection transmitters act on both in alarms (20% of the full scale) and for breakdowns.

TECHNICAL SPECIFICATIONS

| | | | |
|--------------------|---|------------------------------------|------------------------------|
| Scope | Collective, Commercial and industrial | Manual reset button (Reset) | |
| Supply | 110-230 Vac - 50/60 Hz | Alarm silence | 24 h |
| Power | 30 W | Dimensions | 106 (L) x 90 (H) x 58 (W) mm |
| Inputs | 4 analogue or digital | Weight | 300gr |
| Outputs | 2 switched LP (NA-C-NC) ones in alarms and breakdowns | | |
| Indications | Presence, alarm and Sensor fault, central fault and mains failure | | |

Analogue version compatible with

- Combustible gases S/3 Sensors
- Toxic gas S/3 and S/2 Sensors
- Toxic gas S/10 Sensors

Digital version compatible with

- Combustible gases S/3 Sensors

| REFERENCE | NAME | INPUT | ALARMS LEVEL |
|-----------|-------------------|------------|--|
| 04458 | CS4+ CONTROL UNIT | 4-20 mA | Low level: between 5% and 35% of full scale High level: between 10% and 60% of full scale |
| 03244 | CS4 CONTROL UNIT | 0 -10/15 V | 20% of the full scale |

1. ALARM CONTROL UNITS

D-150i Detector

Detects the presence of toxic gases across two alarm levels and as it is a Type A detector, it is equipped to take executive actions in the event of a leak. It also has a 4-20mA current loop output proportional to the measured gas concentration, enabling remote monitoring of the gas concentration and converts the equipment into a real 2 in 1 meter and detector.

Typical examples of application: warehouses, food maturing warehouses, greenhouses, refrigeration systems, etc.

TECHNICAL SPECIFICATIONS

| | | | |
|--|--|---|---|
| Scope | Commercial and industrial | Test warning and end of life | |
| Supply | 110-230 Vac o 12-24 Vdc | Alarm silencer | 24 hr. magnetic switch Magnet Included |
| Power | 5 W | Dimensions and weight | 198 x 103 x 67 mm 660 gr |
| Output | 4-20 mA for gas concentration monitoring | Includes | FIDEGAS® test kit to check proper operation during: - Start-up - Maintenance |
| Two separate outputs | Low-level switched output High-level (NC) LP output |  | |
| Sensor | Infrared / Electrochemical | | |
| Useful life (according to Sensor) | 2/5 years in clean air approx. | | |

2. GAS DETECTION TRANSMITTERS

S/3-2 Gas Detection Transmitters

S/3-2 remote gas detection Sensors detect the presence of combustible gases. Their 4-20 mA current loop output industrial-standard output is proportional to the concentration of gas present in the air. They offer a high level of linearity and accuracy in detection and can be used in a system with inputs for 4-20 mA, or with FIDEGAS® compatible with control units.

2. GAS DETECTION TRANSMITTERS

S/3-R • S/2-R Refrigerant Gas Transmitter

S/3-R

S/2-R

Industrial refrigeration systems use gases that can be toxic, flammable or displace oxygen. In addition to affecting people's health, they also pose risks to the environment. Therefore, to meet safety and environmental requirements, European regulations have been strengthened by making leak detection mandatory in most installations.

Refrigerants are classified according to their **level of flammability and toxicity**:

| | | TOXICITY | | SECURITY group |
|--------------|--------------------------|-------------------|--------------------|-----------------------|
| | | A Low toxicity | B High toxicity | |
| FLAMMABILITY | 1 Non- flammable | A1 | B1 | L1 HIGH SAFETY |
| | 2L Low flammability | A2L | B2L | L2 MEDIUM SECURITY |
| | 2 Medium flammability | A2 | B2 | L3 LOW SAFETY |
| | 3 High flammability | A3 | B3 | |

2. GAS DETECTION TRANSMITTERS

2-Wire Gas Transmitter TG-2H

INCLUDED

TG-2H

TG-2H 2-wire gas transmitters detect the presence of toxic gases or oxygen. Its industrial standard output in 4-20 mA current loop is proportional to the concentration of the gas present in the air. They offer high linearity and precision in detection and can be used in a system that has inputs for 4-20 mA.

Complete your gas detection system with the following FIDEGAS® compatible products

Analogue CS4 Control Unit ATEX CA Control Units

Modules of Industrial Communication

SCAEDA

S/3-T • S/2-T temperature transmitter

S/3-T

S/3-T ambient and temperature transmitters operate as a temperature meter. Their 4-20 mA current loop industrial-standard output is proportional to the temperature measured. They offer a high level of linearity and accuracy in terms of measurement and can be used in a system with inputs for 4-20 mA, with FIDEGAS® compatible control units or with industrial communication modules.

S/2-T

TECHNICAL SPECIFICATIONS

| | | | |
|---------------------------|--|--|---|
| Scope | Commercial and industrial | Outputs | LP and 4-20 mA |
| Supply | 12-24 Vdc | Connectivity | Serie TTL RS-485 (optional) |
| Detection range | Adjustable when required by customer (standard -20 °C to 80 °C) | Enclosure | ATEX: IP66 ABS: IP66/67 |

ACCESSORIES HIGH VALUE ADDED

For gas control units and remote sensors

LS3 SUPPORT for S/3 Sensor

| | |
|-----------|-------|
| Reference | 03665 |
|-----------|-------|

Accessory for attaching S3 sensors to the ceiling or other horizontal surface to maintain the correct mounting position with the sensor oriented vertically downwards. It is suitable when installation on a wall or vertical surface is not possible.

SPLASH GUARD for Sensor S/3 and S/2

| | |
|-----------|-------|
| Reference | 04056 |
|-----------|-------|

| | |
|------------|--------------------|
| Dimensions | 10 cm high Ø 10 cm |
|------------|--------------------|

The splash guard is an accessory that protects the sensor.

PROTECTOR for S/3 and S/2 transmitters

| | |
|-----------|-------|
| Reference | 04687 |
|-----------|-------|

| | |
|------------|--------------------|
| Dimensions | 248 X 150 x 105 mm |
|------------|--------------------|

Stainless steel wall-mounting bracket designed to protect the S/3 and S/2 transmitters from potential mechanical impacts and splashes.

GAS COLLECTOR CONE

for Sensor S/3 and S/2

| | |
|------------|---------|
| Reference | 03645 |
| Dimensions | Ø 30 cm |

The gas collector cone is an accessory that attaches to the remote sensor to improve the capture of lighter-than-air gases such as methane, hydrogen, etc. in installations where the sensors are located above the points of possible gas leakage or emission.

S-3 mask with active carbon filter

| | |
|-----------|-------|
| Reference | 01314 |
|-----------|-------|

FIDEGAS® activated carbon filters protect the sensor against external contaminants, without causing interference in the detection of the target gas. The filter is contained in a special mask to be placed on the Sensor holder.

S/10 Cable

| | |
|-----------------|---|
| Reference | 00025 |
| Connection | C / ND --- S/10 Combustibles |
| Characteristics | 4 x 0,22 mm ² (shielded) |
| Format | Rolls 100 m |
| Standard | IEC 60332-1, IEC 60332-3, IEC 60754-1 IEC 60754-2, IEC 61034 |

S/3 Cable

| | |
|-----------------|---|
| Reference | 00308 |
| Connection | CA --- S/3, S/2 o S/10 toxic (without connections) |
| Characteristics | 3 x 0,75 mm ² (shielded) |
| Format | Rolls 50 / 100 / 500 m |
| Standard | EN 60079 - 25 "intrinsically safe" EN 50267 - 2-1 / 2-2 "halogen-free" |

RS-485 Cable

| | |
|-----------------|--|
| Reference | 03430 |
| Connection | Bus RS-485 |
| Characteristics | 2 x 2 x 0,5 mm ² (shielded) |
| Format | Rolls 100 / 500 m |

3. ACCESSORIES FOR CONTROL UNITS AND SENSORS

Dry Battery **B-01**

| | |
|------------|------------------|
| Reference | 00032 |
| Voltage | 12 Vdc |
| Capacity | 3 Ah |
| Dimensions | 110 x 60 x 80 mm |
| Weight | 1500 gr |

Uninterrupted power supply **UPS**

| | |
|----------------|---------------------------------|
| Reference | 00035 |
| Technology | Interactive Line with AVR |
| Supply voltage | 230 Vac |
| Output voltage | 230 Vac |
| Dimensions | 330 x 110 x 140 mm |
| Autonomy | 30 - 90 min. depending on loads |

IP66 fabinet for AC-01 Control units

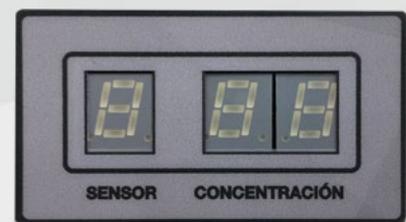

| | |
|-----------------------------------|--------------------------------|
| Reference | 00107 |
| Dimensions | 430 (L) x 500 (H) x 210 (W) mm |
| Degree of protection | IP 66 |
| Metalic cabinet for control units | Ref. CA and C / ND |

Display module **MOD-V1**

| | |
|-------------------------|----------------|
| Reference | 00047 |
| Valid for control units | CA - 2 / 4 / 8 |

The display module is an accessory for CA-2/4/8 alarm control units, which displays the gas concentration measured through each one of the gas detection transmitters connected to the control unit through a 3-digit display. This accessory is factory-fitted.

Alarm **AL-2**

| | |
|-----------|--------------------------------|
| Reference | 00045 |
| Alarm | Acoustic |
| Power | 85 dB acoustics one meter away |
| Supply | 12 Vdc |

| Alarm | AL-3 | AL-4 |
|-------|-------------|-------------|
|-------|-------------|-------------|

| | | |
|------------------|----------------------------------|-------------------|
| Reference | 00028 (12 Vdc) 03190 (24 Vdc) | 03604 (12/24 Vdc) |
| Level sound | 104 dB at 1 metre | 106 dB at 1 metre |
| Light | Bright flash | Flashing light |
| Max. consumption | 110 mA | 45 mA |
| Protection level | IP315 | IP65 |
| Dimensions | 155 x 114 x 44 mm | Ø 97,5 x 104 mm |

Flow switch **IF-01**

| | |
|-------------|-------------------|
| Reference | 00370 |
| Dimensions | 250 x 160 x 26 mm |
| Voltage | 230 Vac |
| LP Contacts | 230 Vac |

* Available spare flow switch reference 00093

Air flow detection device in compliance with the requirements of Standard UNE 60670-6:2023. With all FIDEGAS® features to ensure maximum safety.

Differential Pressure Switch

| | |
|----------------|-----------------|
| Reference | 04022 |
| Pressure range | 0,3 - 3 mbar |
| Contacts | 0,4 A / 250 Vac |
| Weight | 160 gr |

Manual reset **RM-01**

| | |
|------------|-----------------|
| Reference | 03101 |
| Dimensions | 60 x 63 x 26 mm |
| Voltage | 230 Vac |

Equipment equipped with a push button (Manual Reset) to activate a solenoid valve once the extraction has been activated and the flow Switch or differential pressure Switch is in operation. It has an optical indication of extraction on and solenoid valve on , maximum safety and comfort for the user.

3. ACCESSORIES FOR CONTROL UNITS AND SENSORS

FIDEGAS® Test Kit

The FIDEGAS® Test Kit is a product Includedsd in our certifications to comply with the regulatory requirements that allows the verification of the proper functioning of FIDEGAS® Remote Sensors and Detectors, for the commissioning and subsequent maintenance. It Includes 405 ml of gas and the mask to apply the gas.

Pole **P-01** and **P-02**

| Model | Reference | Length |
|-------|-----------|---------------------------------------|
| P-01 | 00344 | Extension 1,5 metres for S/3 y S/2 |
| P-02 | 03801 | Extension 4,5 metres for S/3 y S/2 |

Essential for servicing / maintenance of Remote Sensors Ref. S/3 or S/2 at heights or in difficult access areas, additionally a Test Kit is required. Telescopic extension pole 1.5 metres or 4.5 metres. Both with 180° swivel mask.

MS3-WD-RS485 Module

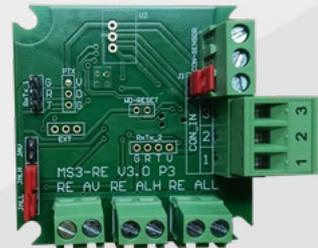

Optional communications module for S/3, S/2 and S/10 toxic FIDEGAS® remote sensors with serial communication enabling RS-485 connectivity.

MS3-RE V3 Module

| | |
|-----------|-------|
| Reference | 03932 |
|-----------|-------|

Accessory module for FIDEGAS® remote sensors, providing remote sensors with relay outputs suitable for connection to other systems: two alarm outputs configurable as NO or NC, with or without interlocking, and one fault output. Alarm levels configurable at the factory or subsequently via software.

M-CAL calibration module

| | |

| Reference | 04015 |
|-----------|-------|

Accessory module for gas transmitters in the Ref. S/3 or S/2 (T1, T2, Series, IR) and S/10 Toxic ranges, enabling field calibration using buttons or a magnet.

3. ACCESSORIES FOR CONTROL UNITS AND SENSORS

GPRS Telecontrol

| | |
|-----------------|---|
| Reference | 00317 |
| Supply | 12 Vdc |
| Compatible with | Alarm control units /Gas Detection Transmitters / Detectors |

Telecontrol and telemetry equipment via GSM/GPRS for industrial environments, which allows monitoring remote devices in a simple and efficient way. Sending alarm signals, analogue signals, digital signals, modbus variables, etc. Data logging and visualisation function in scada web.

MIR V3 Remote Indicator

| | |
|------------|-------|
| Outputs LP | 03845 |
| Buzzer | 03846 |

Compatible device for FIDEGAS® S/3 Remote Sensors to remotely display the measured concentration.

MIR V3 Display Module

| | |
|--------|-------|
| LP | 03809 |
| Buzzer | 03829 |

Optional display module for FIDEGAS® S/3 remote sensors to display the measured concentration in three digits on the remote sensor itself.

USB-TTL connection cable

| | |
|-----------|-------|
| Reference | 01000 |
|-----------|-------|

USB-TTL cable for connection between device with USB-TTL communication with a PC.

USB-RS 485 Connection cable

| | |
|-----------|-------|
| Reference | 03218 |
|-----------|-------|

USB-RS485 cable for connection between device with USB-RS485 communication with a PC

Calibration mask **MK-E7**

| | |
|-----------|-------|
| Reference | 03297 |
|-----------|-------|

Calibration cover for S/3 and S/2 gas detection transmitters.

Calibration mask **MK-D150i**

| | |
|-----------|-------|
| Reference | 03541 |
|-----------|-------|

D-150i Cover support
Calibration cover
Verification cover

Field calibration cover for D-150i detector.

Calibration cover

Verification cover

CUSTOM-MADE MODULAR SYSTEMS

We work towards ensuring personal safety.

We present a **modular gas detection system** based on **serial communication**, with a high degree of versatility, allowing for installations tailored to customer needs, from a small stand-alone installation with a few sensors to integration into large systems with numerous sensors and levels of action.

It Includes standard industrial communication protocols for its integration in complex systems, initially modbus rtu, **modbus tcp/ip**.

The entire system can consist of up to **4 hierarchical levels**:

SCADA

The control and monitoring function of very complex systems with a large number of devices usually dependent on some type of SCADA, which are IT applications that allow the viewing, recording and/or simultaneous control of a large number of signals. Depending on the needs, they may be accessible remotely via the internet (SCADA WEBSITE) or have local restricted access (plant SCADA).

MODBUS MASTERS

Machines with input MODBUS protocol for connection with FIDEGAS® masters and that can be connected to higher-level devices such as plant PLC or SCADA.

FIDEGAS® MASTERS

Machines with input proprietary protocol (FIDEGAS® Series) and some type of industry standard such as output protocol. Will be used to connect a certain number of FIDEGAS® slaves to an industrial communication BUS and 3 or 4 level equipment.

According to the needs of the installation they can connect directly with equipment of level 4. In some cases they will have executive power and can form an autonomous system with external monitoring.

FIDEGAS® SLAVES

Machines with proprietary communication protocol with its own code for each type of device. The physical format used will be the 485, although may be used in TTL levels in certain cases.

There are other types of devices that complement those already described.

Complement: Device that is integrated into the serial bus FIDEGAS® but does not have its own address or protocol.

Equipment: MC-MOD-P

Gateway: A device that translates one type of industrial protocol into another type of protocol. It will normally be installed for the integration of FIDEGAS® teachers in field buses other than those incorporated.

Equipment: MC-ETH-P.

MC-MOD Modbus Module

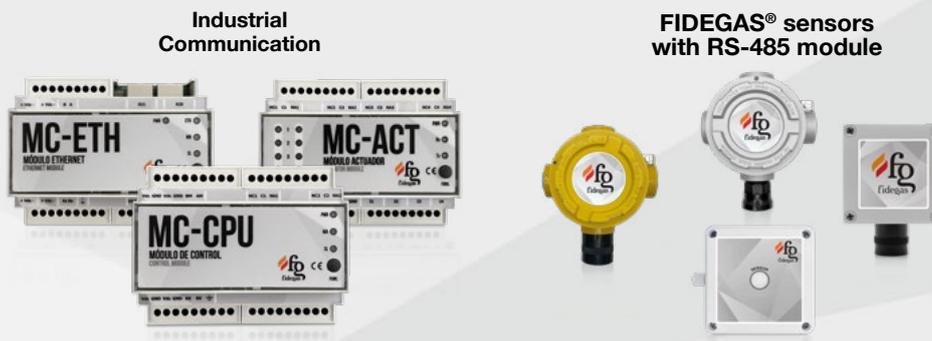

FIDEGAS® master module that can be attached simultaneously to one or two MODBUS RTU communication buses via RS-485 connection. Allows the connection of up to 15 FIDEGAS® devices with the aim of monitoring information, accessible from each of the same.

TECHNICAL SPECIFICATIONS

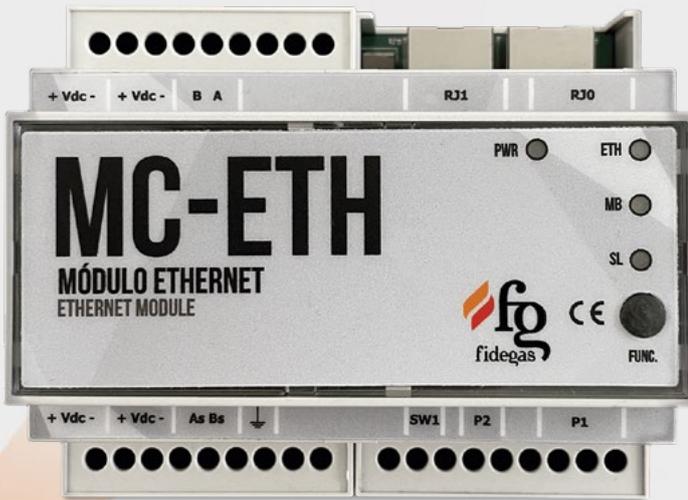

| | | | |
|-------------------------|---------------------------|--------------------|------------------------------------|
| Scope | Commercial and industrial | Indications | Supply, communication input/output |
| Supply | 12-24 Vdc | Dimensions | 36 (L) x 90 (H) x 58 (W) mm |
| Input protocol | Serie Fidegas® | Weight | 100 gr |
| Protocol Outputs | 2 x Modbus RTU | | |

Complete your gas detection system with the following FIDEGAS® compatible products

| REFERENCE | NAME |
|-----------|-------------------------|
| 03149 | MC-MOD-FG MODBUS MODULE |
| 04038 | MC-MOD-P MODBUS GATEWAY |

MC-ETH Ethernet Module

FIDEGAS® master module, the function of which is to integrate up to 15 field bus FIDEGAS® slaves based on Ethernet, mainly Modbus TCP/IP. We also have a Modbus-RTU gateway to Ethernet version.

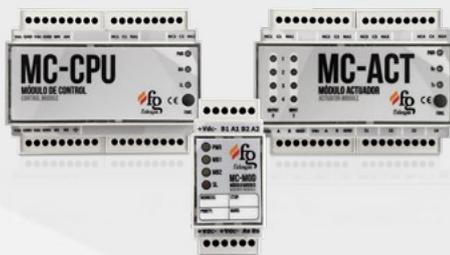

TECHNICAL SPECIFICATIONS

| | | | |
|-----------------------|---------------------------|--------------------|------------------------------------|
| Scope | Commercial and industrial | Indications | Supply, communication input/output |
| Supply | 12-24 Vdc | Dimensions | 106 (L) x 90 (H) x 58 (W) mm |
| Input protocol | Serie FIDEGAS® | Weight | 200 gr |

Complete your gas detection system with the following FIDEGAS® compatible products

Industrial Communication

FIDEGAS® sensors with RS-485 module

| REFERENCE | TYPE | NAME | CONSUMPTION | PROTOCOL |
|-----------|------------|--------------------------------|-------------|-----------------------------|
| 03552 | MC-ETH-MB | MODBUS TCP/IP ETHERNET MODULE | 1,5 W | Modbus RTU Modbus TCP/IP |
| 03553 | MC-ETH-PMB | MODBUS TCP/IP ETHERNET GATEWAY | 1,2 W | Modbus RTU Modbus TCP/IP |

MC-ACT Actuator Module

FIDEGAS® slave module with 4 switched Outputs that allows the master to remotely control external devices such as alarms or ventilation. It also has 4 Inputs that allow to act locally on the Outputs. Suitable for DIN rail installation.

TECHNICAL SPECIFICATIONS

| | | | |
|-----------------------------|---------------------------|-----------------------|---|
| Scope | Commercial and industrial | Self-diagnosis | Automatic fault detection |
| Supply | 12-24 Vdc | Indications | Supply, communication, input / output, faults, input status / Outputs |
| Outputs | 4 x LP Conmutadas | Dimensions | 106 (L) x 90 (H) x 58 (W) mm |
| Inputs | 4 x LP (NA) | Weight | 100 gr |
| Communication series | PROTOCOL FIDEGAS® | | |

Complete your gas detection system with the following FIDEGAS® compatible products

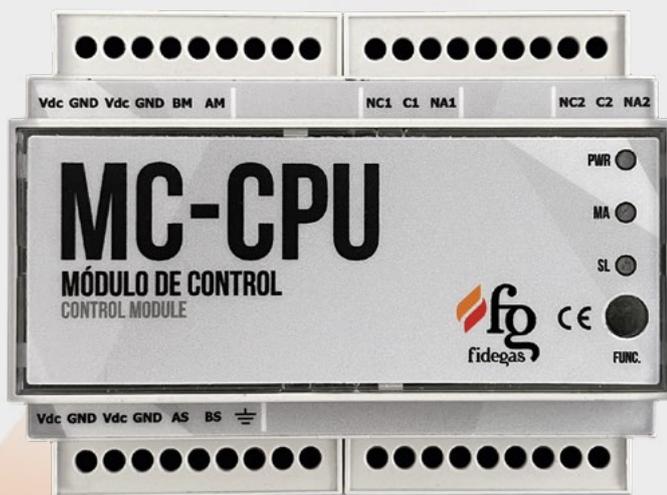

REFERENCE

NAME

03412

MC-ACT ACTUATOR MODULE

MC-CPU Module Control

FIDEGAS® module with executive capability that allows it to act as a control unit. It can be configured as a FIDEGAS® master for the control of up to 15 FIDEGAS® SLAVES or as a MODBUS master for connection to other MODBUS slaves. In both cases it has a Modbus RTU Outputs. Suitable for DIN rail installation.

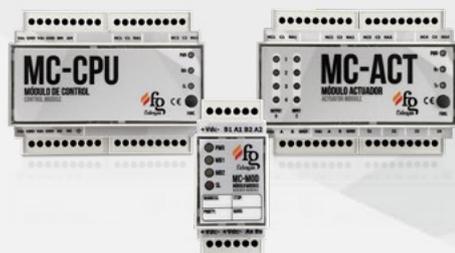

TECHNICAL SPECIFICATIONS

| | | | |
|------------------------|------------------------------|---|---|
| Scope | Commercial and industrial | Indications | Supply, Communication, Input / Output, faults, input / input status, Slave status |
| Supply | 12-24 Vdc | Dimensions | 106 (L) x 90 (H) x 58 (W) mm |
| Input protocol | Serie FIDEGAS® or Modbus RTU | Weight | 225 gr |
| Output Protocol | Modbus RTU | USB configuration port available Configuration software MC-CONFIG. | |
| Outputs | 2 LP Commmuted | | |

Complete your gas detection system with the following FIDEGAS® compatible products

Industrial Communication

FIDEGAS® sensors with RS-485 module

REFERENCE

NAME

03669

CONTROL MODULE MC-CPU MODBUS-MODBUS

03887

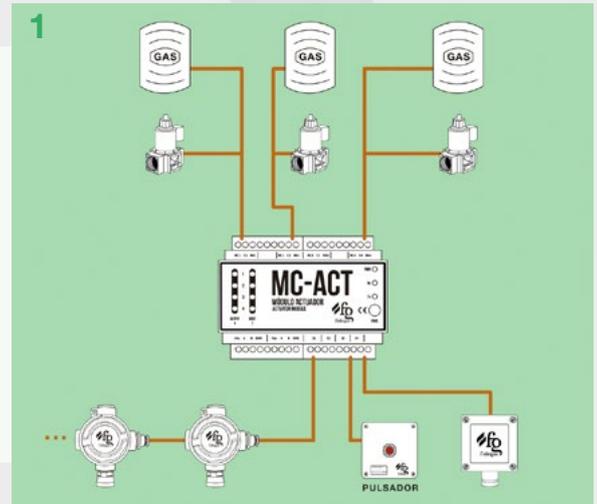

CONTROL MODULE MC-CPU MODBUS-FIDEGAS®

INSTALLATION 1

Description

Example of level 1 standalone installation without control unit. The actuator module outputs are directly controlled by the sensors (through their LP outputs) connected to the module inputs.

This configuration allows the series connection of multiple sensors, therefore allowing one run of cable to be used to interconnect multiple sensors.

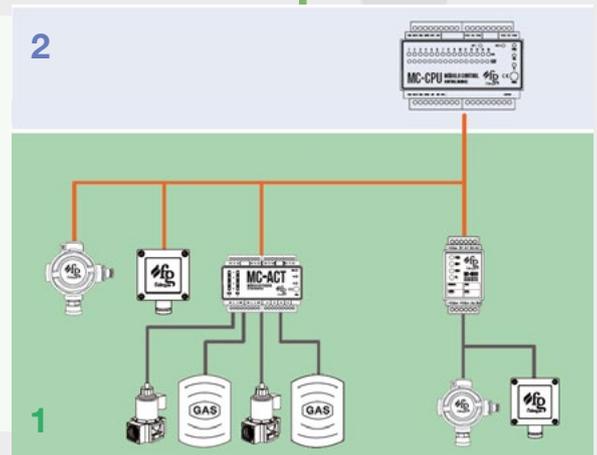

INSTALLATION 2

Description

Example of a level 2 stand-alone INSTALLATION with control unit and without external monitoring.

The MC-CPU module acts as a control unit, controlling several FIDEGAS® SLAVES connected in series to the FIDEGAS® master input port RS-485, and carrying out the executive actions of activation-deactivation of alarms, solenoid valves, etc. The MC-MOD-P module acts as a gateway, allowing a line to be branched.

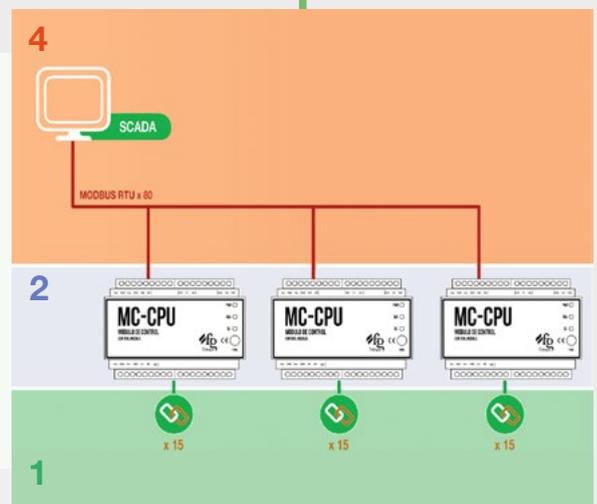

INSTALLATION 3

Description

An example of 3 level 2 autonomous installations with external monitoring to a SCADA through the MC-CPU MODBUS-RTU slave RS-485 ports.

Some level 3 device may be required in certain cases according to the nature of the SCADA for its connection with the MC-CPU controller modules.

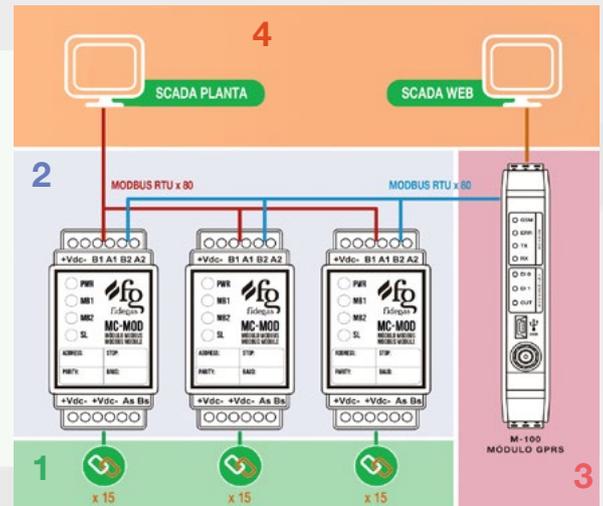

INSTALLATION 4

Description

An example of a level 2 installation composed of 3 MCMOD modbus modules, from which up to 15 FIDEGAS® slaves connected in series to its FIDEGAS MASTER input RS-485 port can be "hung".

One of the MODBUS-RTU slave output RS-485 ports from the modules is used for the on-site monitoring through a plant SCADA (level 4), and the other is used for remote monitoring via a GPRS M100 (Level 3) module that is connected to a SCADA WEB (level 4).

In this case, any executive action that may be required would depend on either the plant SCADA or in GPRS module.

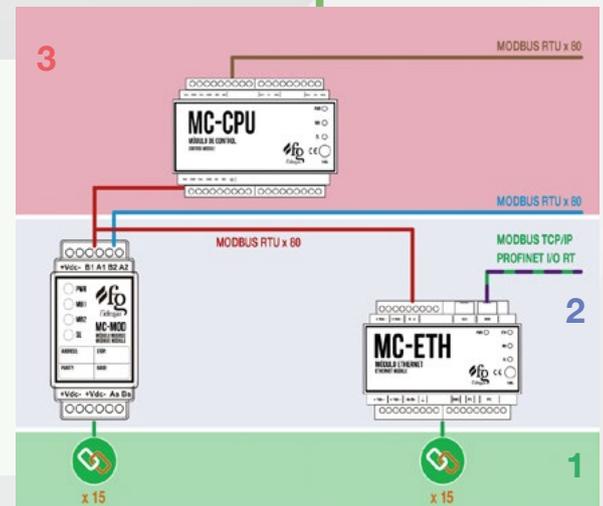

INSTALLATION 5

Description

An example of an installation where the MC-CPU module acts as a level 3 MODBUS master for the control of FIDEGAS®, master, therefore also performing the executive actions.

This system configuration allows for several external connections through the unused communication ports, which would allow their integration into more complex systems.

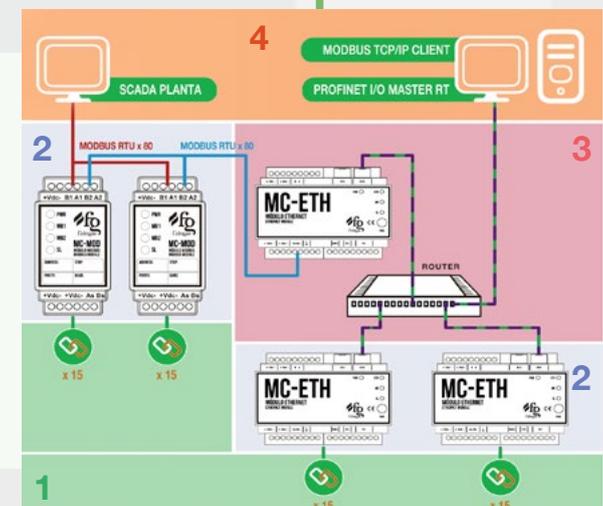

INSTALLATION 6

Description

An example of complex installation with two level 2 installations, one with MC-MOD modules and another with MC-ETH modules.

In the first of these, one of the MODBUS RS-485 slave ports is used for connection to a plant SCADA and the other one for connection to a MC-ETH module as a gateway (level 3) that connects to a remote SCADA via the internet using a router for this purpose.

SELECTION GUIDE

5. DOMESTIC DETECTORS

D-202 Detector

Detects the presence of Natural Gas or Butane/Propane and is equipped for the automatic shut-off of gas in the event of any leak, with the highest degree of safety and precision, thanks to its design, which strictly follows the directives of Standard EN 50194-1/2, in compliance with the requirements of the European Directives 2014/30/EU on Electromagnetic Compatibility and 2014/35/EU on Low Voltage.

TECHNICAL SPECIFICATIONS

| | | | |
|---------------------|--------------------------------|--|-------------------------------------|
| Supply | 12-24 Vac | Useful life | Approximately 5 years in clean air. |
| Power | 1,5 W (12 Vdc) / 2,5 W (24Vdc) | Dimensions and Weight with surface box | 84 x 84 x 51 mm / 125 gr |

HIGH ADDED VALUE ACCESSORIES

For domestic range of detectors

Power supply source **FA-20X**

| | |
|---------------------|--|
| Reference | 00026 |
| Input voltage | 230 Vac |
| Output voltage | 12 Vdc that can be short circuited |
| Power | 5 W |
| Dimensions / weight | 84 x 84 x 51 mm / 125 gr with surface box |
| Dimensions / weight | 84 x 84 x 42 mm / 70 gr without surface box |

Battery **B-02i**

| | |
|-------------------------------------|------------------|
| Reference | 00194 |
| Voltage | 8,4 Vdc |
| Capacity | 1,6 Ah |
| Dimensions | 100 x 50 x 15 mm |
| Weight | 258 gr |
| Complies with Directive 2008/103/EC | |

Voice module **MV-20Xi-194i**

| | |
|-----------|-------|
| Reference | 00202 |
|-----------|-------|

Suitable for people with disabilities: optical, acoustic and voice recorded messages. Voice recorded messages module for D-194i and D-20Xi gas detectors.

Messages: alarm, breakdown, maintenance and end of life.

Module **KNX D-20Xi**

| | |
|-----------|-------|
| Reference | 02231 |
|-----------|-------|

Module for integrating the D-20Xi gas detector in KNX IBOX-KNX-FDGD20X domestic systems.

Lock push button **PB-01**

| | |
|------------|-----------------|
| Reference | 00034 |
| Dimensions | 90 x 90 x 40 mm |
| Weight | 125 gr |

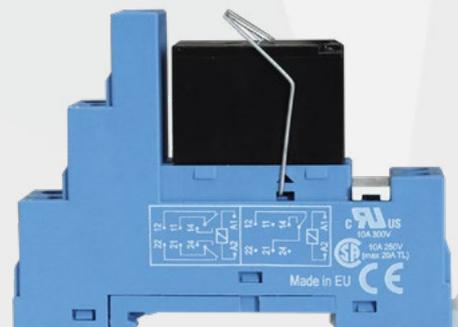

Normally closed push button valid for locking the alarm output in detectors and manually reset them.

Auxiliary relay **RA-01**

| | |
|-------------------|---------------|
| Reference | 00029 |
| Coil voltage | 12 Vdc |
| Contacts | 2 x NC-C-NA |
| Maximum Switching | 250 Vac / 5 A |

Auxiliary relay that extends the output options for domestic detector: connection of 230 Vac solenoid valves, etc.

7

Gas Meter M-1000

Fixed installation gas meter. Configurable optical alarm indication. Includes software for configuration and data logging, where it is possible to monitor the measured gas concentration and the temperature and relative humidity of the environment. Ideal application for indoor air quality measurement. Modbus RTU version available for integration in intelligent monitoring systems.

TECHNICAL SPECIFICATIONS

| | |
|------------|----------------------------------|
| Supply | 5 vdc |
| Sensor | Infrared NDIR |
| Alarm | Software configurable |
| Dimensions | 51 (W) x 51 (H) x 25,5 (fund) mm |
| Weight | 60 gr |

Free software available for data logging and configuration.

FIDEGAS® IAQ KIT Monitoring System

Indoor monitoring system FIDEGAS® IAQ

The Fidegas® IAQ indoor monitoring system is based on the detection of target gases that determine the indoor air quality. Based on the modular industrial communication system and the M-1000 gas meter range it is possible to manage up to 50 sensors. The connection to the gas meters via RS-485 is plug-and-play.

Access to the system through its Modbus RTU outputs.

TECHNICAL SPECIFICATIONS

| | | | |

AV-02 warning system

Device that manages the installation's gas needs via SMS messages or in an application via GPRS connection. A pressure switch controls the pressure in the installation, making the Gas Request when necessary. A push button allows you to request technical assistance on the configured telephone.

TECHNICAL SPECIFICATIONS

| | | | |
|-------------------|-------------------|---------------------------------|---|
| Supply | 230 Vac | Signals | Technical assistance Order confirmed Gas pressure below 0.8 bar Gas pressure above 1.5 bar GSM signal level |
| Dimensions | 160 x 105 x 60 mm | Includes pressure switch | Optional pressure transducer also available |
| Weight | 900 gr | SIM card not Included | |

REFERENCE

00062

AV-02 warning system

ME-01 Magiscope

Remote low pressure warning device in domestic gas lines, to allow users to manage the replacement of the bottles before they fully run out.

TECHNICAL SPECIFICATIONS

| | | | |
|-------------------|--------------------------------|---------------------------------|---|
| Supply | 3 Vdc (2 X 1.5 V AA batteries) | Indications | Service pressure > 1.2 Kg/cm ² Low pressure < 0.8 Kg/cm ² Battery low (BAT) |
| Dimensions | 125 x 70 x 25 mm | Includes pressure switch | |
| Weight | 350 gr | | |

REFERENCE

00409

ME-01 Magiscope

D-70 automatic locking

Automatic gas shut-off device for LPG cylinders with manual reset by actuating the shut-off flap. It is controlled by a detector with executive Outputs, TYPE A (D-194i, D-195i, D-20Xi).

TECHNICAL SPECIFICATIONS

| | | | |
|-------------------|-------------|--------------------|-------------------|
| Supply | 12 Vdc | Consumption | 160 mA / 1,92 W |
| Dimensions | 165 x 44 mm | Certificate | REPSOL - GE 97157 |

Compatible with

Domestics Detectors

REFERENCE

00007

D-70 automatic locking

CM-01 Electronic Switch

Device designed to comply with RD 1027/2007 RITE. Its function is based on detecting when the boiler/heater is in operation and prevents the kitchen extractor fan/smoke hood from being used at that moment, avoiding a depression and most probably the formation of CO in the atmosphere. Tested by LCOE (ENAC accredited) in compliance with the standards mentioned in its user manual.

TECHNICAL SPECIFICATIONS

| | | | |
|-----------------------------|--------------------------|-------------------|------------------|
| Supply | 230 Vac | Dimensions | 125 x 70 x 45 mm |
| Optic sensor | Infrared cell (<70° C) | Weight | 150 gr |
| Output for extractor | Consumtion maximum 3.2 A | | |

REFERENCE

00231

CM-01 electronic switch

ESPAÑA

(7) Este equipo o sistema de protección y sus variantes eventualmente aceptadas está descrito en el anexo del presente certificado y en los documentos descriptivos citados en dicho anexo

(8) El Laboratorio Oficial J.M. Madariaga (LOM), organismo notificado bajo la referencia nº 0163, conforme al artículo 9 de la Directiva 94/9/CE del Parlamento Europeo y del Consejo del 23 de Marzo de 1994, certifica que este equipo o sistema de protección es conforme a los Requisitos Esenciales de Seguridad y Salud relativos al diseño y construcción de equipos y sistemas destinados a ser utilizados en atmósferas potencialmente explosivas, indicados en el Anexo II de la Directiva. La verificaciones y ensayos se recogen en el protocolo confidencial LOM 03.143 XP

(9) El cumplimiento con los Requisitos Esenciales de Seguridad y Salud está basado en la conformidad a los siguientes documentos:
- Normas **EN 50014:1997 + A1:1999 + A2:1999**
EN 50018:2000 + A1:2002
EN 50054:1998
EN 50057:1998

(10) Si el signo X aparece después del número de certificado indica que este material o sistema de protección está sometido a las condiciones especiales de utilización que figuran en el anexo del presente certificado.

(11) Este Certificado de Examen CE de Tipo se refiere únicamente al diseño y construcción del equipo o sistema de protección especificado, conforme a la Directiva 94/9/CE. Podrán ser aplicables exigencias suplementarias de esta Directiva para la fabricación y suministro de este equipo o sistema de protección. Éstas no están incluidas en este certificado.

(12) El marcado del equipo o sistema de protección deberá incluir, entre otras indicaciones relevantes, lo siguiente:
